You must complete all information on this application, otherwise we will be unable to proceed with your request, check the existing network and provide you with a prompt quotation for the work you require.

I have appointed as my chosen electricity supplier

Signature of applicant Date

Connection reference:

(For office use)

When welders or motors start they can have an effect on your and other people's connection. Remember to consider refrigeration, air conditioning equipment, heating, fuel and heat pumps.

Motors

Please provide information on your motors with a rating greater than 0.75kw:

(Note: Please include all non-13 amp plug appliances below):

	1	2	3	4	5
Motor rating (kW)					
How many times an hour will it start?					
Single phase or three phase?					
Motor starting method					
Starting current (amps)					

Welders

Welders can have similar effects on supplies as motors. Therefore, please give as much information as possible.

Type of welder			
Size (kW)			
How many?			
Current			
Phases			

Note: Please complete both sides of this form in full to enable us to issue your quote as soon as possible.

Have you provided your:

Location plan: An Ordnance Survey map is ideal. However a copy of a street plan or hand drawn location plan is acceptable.

Site plans: Ideally these should be copies of plans which have been submitted with your planning application. Please indicate the position of your existing meter(s) and where you would like the new meter(s) to be. Please note: the meter(s) should be within a three metre cable length of your main fuse board.
